EDUCATION

Ph.D., Computer Science, Example University Expected: 2028
B.S., Computer Science, Example College (GPA: **3.9/4.0**), *summa cum laude* May 2023

RELEVANT SKILLS

Languages: Python, C++, JavaScript
Machine Learning: PyTorch, JAX, scikit-learn, pandas, Hugging Face Transformers
Systems: Slurm, Ray, Kubernetes
Tools: Git, Docker, LaTeX

RESEARCH & PROFESSIONAL EXPERIENCE

Graduate Student Researcher, Reliable ML Lab Sep 2023 – Present
Advisor: Prof. Ada Advisor
Python, PyTorch, Slurm

- Lead the ShiftBench benchmark of 40 natural distribution shifts (ECLS 2025 Spotlight)
- Designed elastic checkpointing that cuts lost GPU hours by 35% on preemptible clusters
- Mentor two undergraduate researchers

Machine Learning Engineering Intern, Example Corp Jun 2024 – Sep 2024

- Added data-drift monitoring to a production recommendation pipeline.
- Reduced false alerts by 40% with per-feature thresholds.

Undergraduate Research Assistant, Systems Group, Example College Jan 2022 – May 2023

- Profiled communication overhead in data-parallel training.
- Wrote a senior thesis on gradient compression.

PUBLICATIONS (SELECTED)

Stress-Testing Image Classifiers Under Realistic Distribution Shift [SPOTLIGHT], Doe, J., Roe, J. & Advisor, A., *Example Conference on Learning Systems (ECLS 2025)*

Elastic Checkpointing for Preemptible Distributed Training, Sample, S., Doe, J. & Advisor, A., *Workshop on Efficient Example Systems @ ECLS 2025*

Repairing Shape Errors in Deep Learning Code with Static Analysis, Doe, J. & Roe, J., *Preprint, 2025*

PROJECT EXPERIENCE

ShiftBench: Benchmarking Robustness to Real Distribution Shift Jan 2024 – Present
Research Project
Python, PyTorch, Benchmarking

- Collected 40 natural distribution shifts and built a nightly-updated robustness leaderboard
- Released the benchmark as an open-source Python package used by 3 research groups

ShapeCheck: Static Shape Checking for PyTorch Jun 2024 – Dec 2024

- Wrote an abstract interpreter that tracks tensor shapes through PyTorch programs.
- Suggests one-line fixes for common shape bugs.

AWARDS AND HONORS

Spotlight Paper, Example Conference on Learning Systems 2025

Graduate Fellowship, Example University 2023–2025

Dean's List, Example College 2020

SERVICE

Reviewer

- Example Conference on Learning Systems (ECLS) (2024, 2025)
- Workshop on Efficient Example Systems (2025)

Artifact Evaluation Committee

- Example Systems Symposium (2025)
