EDUCATION

Ph.D., Computer Science, Example University Expected: 2028
B.S., Computer Science, Example College (GPA: **3.9/4.0**), *summa cum laude* May 2023

RELEVANT SKILLS

Languages: Python, C++, JavaScript
Machine Learning: PyTorch, JAX, scikit-learn
Tools: Git, Docker, LaTeX, Slurm, Ray, Kubernetes

RESEARCH & PROFESSIONAL EXPERIENCE

Graduate Student Researcher, *Reliable ML Lab* Sep 2023 – Present
• Lead the ShiftBench robustness benchmark (ECLS 2025 Spotlight)
• Cut lost GPU hours by 35% with elastic checkpointing

Machine Learning Engineering Intern, *Example Corp* Jun 2024 – Sep 2024
• Added data-drift monitoring to a production recommendation pipeline.
• Reduced false alerts by 40% with per-feature thresholds.

PUBLICATIONS (SELECTED)

Stress-Testing Image Classifiers Under Realistic Distribution Shift [SPOTLIGHT], Doe, J., Roe, J. & Advisor, A., *Example Conference on Learning Systems (ECLS 2025)*
Repairing Shape Errors in Deep Learning Code with Static Analysis, Doe, J. & Roe, J., *Preprint, 2025*

PROJECT EXPERIENCE

ShiftBench: Benchmarking Robustness to Real Distribution Shift Jan 2024 – Present
Research Project Python, PyTorch, Benchmarking
• Collected 40 natural distribution shifts from public image datasets.
• Built a leaderboard that re-evaluates models nightly.
• Released the benchmark as an open-source Python package.
